John Hopkins Whiting School of Engineering (via Coursera)

SKILLS

HTML
CSS
SCSS
JavaScript
Git/Github
Ability to work in a team
Effective Time Management
Good Communication Skills

SUMMARY

I am a Front-end Web Developer who is very skilled in semantic HTML and CSS, whilst just starting in JavaScript. I do not have a lot of experience, but volunteering in hackathons and tech-related events has given me a lot of confidence, working in teams and with other people generally.

I spend most of my time coding solutions to Frontend Mentor challenges and trying to implement designs from my Designer friends and Dribbble.

I would really love a chance to intern in a professional setting for an organization like Patricia as a means of gaining experience and doing what I love - implementing designs.

WORK EXPERIENCE

DSC UNILAG

August 2020

Full-Time

I volunteered in the Open Hack Week event organized by the Developer Student Club, Unilag to contribute to the greater good by building sites for NGOs

I doubled as Team Lead and Frontend Developer, from which I and my team were able to successfully deliver a site for a farm Initiative

DSC UNILAG/ULES

May 2020

Full-Time

I volunteered to be part of a team that built a website for the University of Lagos Engineering Society (ULES)

My Team was able to successfully implement and deliver outstanding designs that composed the site.

ACCOMPLISHMENTS

ULES WEBSITE

Few months later, I single-handedly rebuilt the ULES website.

This was in a bid to practice my SASS skills

The site is built in HTML, CSS(SCSS), and minimal JavaScript, from scratch.
